

48358 Elin lace / Jute placemat

2026 COLLECTION

Stories that shape our lives

Everything carries a story. And a meaning. A worn pine floor, patinated by light running and heavy steps, the gravel path raked again and again.

A rug or a basket, carefully woven by skilled hands across generations. Thoughtfulness that creates meaning and identity. Surround yourself with stories that matter, cherish them, keep them close, and pass them on.

ON THE FLOOR

37864 Elin / Jute rug
Honey Comb natural 230 x 160cm

Many of our sustainable jute rugs and doormats are woven by hand in southern India. Jute is a hard-wearing fibre that is soft and easy to work. The result is beautiful and classic rugs and doormats where every product is unique.

OUR SUPPLIERS
– INDIA –

CIRCULAR CRAFTMANSHIP

Sewing borders at sisal rug

Weaving jute rugs on traditional hand loom

In India you find our amazing suppliers of jute, sisal and rubber mats. All our sisal mats are machine woven, whereas the jute rugs are hand woven, in the old artisan tradition, from machine- or hand-spun yarn.

Our Indian producers have a well-developed circular approach. Many work together to find solutions enabling them to maximise the lifetime of products and make optimum use of waste products from a circular-economy perspective. Our suppliers have also secured access to fresh water by using an efficient water treatment system.

Social and environmental responsibility is very important for our suppliers as well. We are proud that they mostly score very highly when AMFORI, an organisation that promotes social responsibility and sustainable working conditions, carries out its inspections.

Punching rubber doormat with mould

Rugs made from sisal are naturally strong and suitable for most inside areas.

All our sisal rugs are now certified according to OEKO-TEX STANDARD 100.

OUR SUPPLIERS
– VIETNAM –

BASKETS THAT BIND TWO WORLDS TOGETHER

Weaving baskets by hand from dried water hyacinth stalks.

Harvesting water hyacinth stalks in the Mekong delta

Making steel constructions for baskets

Many of our finest and most popular baskets are made by hand from water hyacinths in Vietnam. Water hyacinths are beautiful lilac colour when they bloom . They cause a lot of problems though. They spread uncontrollably and clog up the watercourses that are an important source of fresh water around the Mekong Delta. The stalks can however be used. They are harvested, dried and hand woven by skilled craftspeople to become much-loved baskets and pouffes.

We are really proud of our baskets. Because of their attractive design, but perhaps most of all because of our long-term, close partnership with our producer in Vietnam. A well-run, sustainable factory a short distance from Saigon.

Natural, local production

The baskets production provides work for around a hundred people and many local farmers who live their lives by the river.

The water hyacinths grow on the surface of the water like a floating weed. The farmers who monitor the plant population harvest the longest stalks, while the parent plant is left in the river to grow more. The stalks must then be dried in the sun for a few days before they are stored and woven. The colour and structure of the stalks may vary slightly depending on the time of year.

As water hyacinths are living materials that are affected by how they grow and are dried and woven, the baskets become a unique addition to your home.

Making baskets and placemats with hand sewing machine.

OUR SUPPLIERS - BANGLADESH -

A BUSINESS RUN SUSTAINABLY

Bangladesh is the country, where many of our baskets and place mats are made. A lot of jute and seagrass grow here. Our products are made by hand, using sewing machines, needles and scissors. You can really see the hand at work. It means that every product is unique.

Seagrass grows as a weed in Bangladesh and we help nature by using it to make products. Our supplier buys either finished seagrass rope or leaves that are twisted by hand. All jute is grown, which requires a lot of sun and a humid climate. It is not surprising then that 90% of the world's jute is grown in Bangladesh and India.

The women and men who work at the factory are highly skilled with a sewing machine. A seagrass or jute basket can be produced in a matter of minutes, either using a sewing machine or entirely by hand. It's fascinating to watch. Finally, each product is meticulously inspected, often by women who can spot the slightest flaw thanks to their sharp eyes and long experience as artisans. Our suppliers are proud of their role as employers and take good care of their employees. There is a clear will to develop a sustainably-run business.
